

Thursday 11th October 2007

10 30 Faculty Briefing

11 30 **Registration**

12 00 **Lunch**

Welcome and introduction to the course

13 00 Zimmer welcome S Oakley
Welcome and introductions J Martindale A Manktelow

13 30 **Session 1: The hip; what's the problem?** *Chair: A Manktelow*

This dynamic interactive session provides a forum for the identification of the potential and real problems faced by hip surgeons today. Problems identified by delegates, will be discussed by an expert panel, and key points elucidated. Topics may include; hip replacement in the elderly, the young hip, dysplasia, the failing hip, and the prevention of complications.

Panel members
G Bannister G Charnley C Esler
G Grappiolo P Sherry D Woodnutt

15 00 **Break**

15 30 **Session 2: The hip; what's the solution?** *Chair: J Martindale*

Delegates and Faculty are invited to make suggestions for breakout session topics on the course website. Each delegate has the opportunity to attend two of a total of four sessions offered. Current suggestions include;

The role of trabecular metal in primary and revision replacement of the acetabulum A Manktelow G Charnley
Resurfacing (Durom) P Roberts C Rieker
Large diameter articulations (LDH/CLS) P Sherry A Khan
Uncemented and Mini stems W Kluge G Grappiolo

17 00 **Session 3: The hip; what are the compromises?** *Chair: M Porter*

Panel discussion of two problems, including discussion of the collateral benefits of the development of MIS.

Panel members
A Khan W Kluge P McLardy-Smith
G Bannister P Roberts D Woodnutt

17 45 **End of session**

Friday 12th October 2007
